

GAMM Juniors Mentoring Program

The *GAMM Juniors* are a group of aspiring, highly motivated young researchers in the fields of mathematics and mechanics, selected on the basis of academic merit. The Mentoring Program aims at helping *GAMM Juniors* in their personal and academic growth through low-key exchanges with established members of the mathematics and mechanics community.

As a mentor, you...

...get the opportunity to reflect upon your own career path and pass on your experience

...get to actively shape the new generation of researchers

...expand your network and get new inputs for your work

...strengthen your advisory skills

As a mentee, you...

... can discuss questions with a competent partner other than your supervisor

...gain deeper insights into academic or company structures

...get answers to questions such as:

- How do I gain visibility?
- How do I find a suitable position for my future career?
- How do I achieve a sustainable work-life balance?
- etc.

Programme Outline

Pairing: December 2022
